Ninety-Fourth Annual Report of the Columbia Institution for the Deaf

COLUMBIA INSTITUTION FOR THE DEAF
Kendall Green, Washington 2, D. C.

GENERAL STATEMENT

The work of the Columbia Institution for the Deaf is devoted to the education of deaf students, whose hearing is so impaired that they are unable to progress satisfactorily in schools and colleges for hearing students. The Institution is composed of four departments, as follows: Kendall School, Gallaudet College, the Normal Department and the Research Department. The aim of the Institution is to promote the welfare and advancement of deaf persons through various educational means and through research work.

Kendall Green

This department is for the younger deaf children of the District of Columbia. The work of The Kendall School extends through all grades up to college entrance. The oral method of instruction is used in this department. However, there are children who cannot progress orally. We, therefore, are prepared to use any and all methods which will bring results. The hard of hearing children of the District are educated in day classes in the Public Schools of the city. Occasionally some of these pupils sent to us by the District authorities have some residual hearing. We have multiple hearing aids for these pupils to use.

This past year a class for preschool-age deaf children was continued. The results of this work have been so encouraging that an expansion of this project is contemplated.

Gallaudet College

This department of the Columbia Institution for the Deaf was established in 1864 by act of Congress. It is for deaf students throughout the United States whose hearing loss is so great that they cannot succeed in colleges for hearing students. A liberal arts courses is of-

ferred those who pass the entrance examinations. This past year students from 42 states, the District of Columbia, Canada, China, Israel, Sweden and Trans-Jordan were enrolled.

Gallaudet College requires of its students a preliminary, or preparatory year, so that assurance may be had that adequate high school work has been completed. Most of the entrants come directly from the state schools for the deaf throughout the country with an average of 11.7 school years.

The curriculum of the college is similar to that of any American college which offers four years of work towards a Bachelor's degree. Courses provide basic training in home economics, languages and literature, mathematics and science, the social sciences, the graphic arts, library science and training for a teaching career. Many of our graduates go into the teaching profession in the various schools for the deaf and have been very successful in this field.

A central point in the college program is the emphasis placed on the individual needs of each student. For this purpose the curriculum has been reorganized along lines, or areas, of concentration. When a student has completed the basic preliminary academic requirements in his first two years of the college proper, he is expected to decide upon the field of interest that bears greatest promise for his upper-class and post-college career. The choice of his area of interest is determined to a large extent by advisory consultation with staff members of the Faculty within the several areas. In this process of individual guidance use is made of a series of educational, personality and differential aptitude tests.

The methods of instruction used in the college are determined by the needs of the courses. Usually the manual means of communication is used combined with the use of speech and lipreading. Few of these college students have any remnant of hearing left; acoustic aids are provided for those who do. Special instruction is provided in speech and lipreading. The college also has a visual aid department with expanding services.

Students show a decided interest in literature, particularly poetry. Their contributions have won high acclaim in literary contests in competition with students from other colleges and universities. A similar interest is shown in dramatics. The students produce and stage their own plays in the college auditorium.

The physical education program of the college stresses personal

and community hygiene, intra-mural athletics, with participation also in intercollegiate competition. The college is a member of the Mason-Dixon Conference, which is composed of 15 colleges and universities in this area. Competition includes basketball, football, wrestling, cross-country and track.

Normal Department

This department of the Institution is for hearing young men and women who wish to teach the deaf. They must be graduates of accredited colleges before they may be admitted for this training course. This past year the enrollment in this department included six men and four women.

Research Department

This is a growing department and was originated to meet the demand of the schools for the deaf in the United States for some central point where research work could be carried on for the advancement of the education of the deaf in this nation.

During the last year systematic psychological testing of the students of the college has been continued. This program includes the use of a series of standardized tests with different college classes, beginning with an achievement and personality test for all students entering the Preparatory Class; for the students of the Freshman Class, the American Council on Education Psychological Examination for College Freshmen; and the National Cooperative College Sophomore Tests at the close of the Sophomore Year. In the past year, also, was added a new series of tests, namely the Differential Aptitude Tests prepared by the Psychological Corporation. This series, given to the students of the Preparatory and Freshman Classes, offers guiding material as to their individual aptitudes.

The Research Department completed a study of certification standards for teachers of the deaf in the nation, made at the request of the Conference of Executives of American Schools for the Deaf. The final report of this investigation, "A Study of Teacher Certification Requirements Among Public Residential Schools for the Deaf," was published by the Maryland State School for the Deaf

ATTENDANCE

During the fiscal year July 1, 1950, through June 30, 1951, there were under instruction in the advanced department of the Institution

115 men and 109 women, a total of 224, representing 42 states, the District of Columbia, Canada, China, Israel, Sweden and Trans-Jordan. This is an increase of 10 as compared with the preceding year.

In The Kendall School there were under instruction 52 boys and 32 girls, a total of 84. This is a decrease of 13 as compared with the preceding year.

Of the total in the Institution, 59 were admitted as beneficiaries of the District of Columbia.

There were admitted to the Institution 44 males and 41 females; discharged 38 males and 43 females.

HEALTH

The health program is in charge of a full-time resident nurse. There were no unusual epidemics during the year. Dr. A. Frances Foye continued as physician for the girls, and Dr. Richard H. Todd carried on his work with the boys. Other specialists were called on for emergencies. Tuberculosis x-rays are given to new students and new employees. Parents are expected to take care of hospital and medical expenses off the campus. A full-time dietitian has full charge of our dining rooms and kitchen, insuring balanced diets for the students and others at all times.
